

# Brandon Davenport

Software Engineer, U.S. Space Force Officer

hello@brandondavenport.dev | brandondavenport.dev | U.S. Citizen | Active TS/SCI Clearance | Open to Relocation

U.S. Space Force operations officer transitioning into software engineering. Personally, I combine critical leadership with strategic organizational communication skills. Technically, I bring full-stack development and data analytics skillsets. I'm proven at leading teams under pressure whilst analyzing complex problems and building practical tools that increase team efficiencies.

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                |

| BARAD-DUR Tracker — AI-Augmented Project Management Platform                                                                                                                                                                                                                                                                                                           |
| <ul style="list-style-type: none"><li>Designed a full-stack platform on a FastAPI/Python service layer with real-time WebSocket updates.</li><li>Integrated an AI service layer with a custom tool registry and semantic tool-selection engine.</li><li>Natural-language interaction with data via embeddings-based retrieval and LLM-driven task execution.</li></ul> |
| Office Automation Suite — Python & PowerShell Scripting                                                                                                                                                                                                                                                                                                                |
| <ul style="list-style-type: none"><li>Developed scripts that automated repetitive data-entry and system-management tasks, reducing administrative overhead and manual errors.</li><li>Applied object-oriented programming and scripting best practices to resolve real operational bottlenecks.</li></ul>                                                              |

## Education

|                                                                                 |          |
|---------------------------------------------------------------------------------|----------|
| M.S., Organizational Communication — Murray State University                    | 4.0 GPA  |
| Graduate Certificate, Data Analytics — Air Force Institute of Technology        | 3.8 GPA  |
| B.S., Information Technology — Liberty University                               | 3.95 GPA |
| A.A.S., Mechanical & Electrical Technology — Community College of the Air Force | 4.0 GPA  |

## Skills

**Languages:** Python, JavaScript, HTML/CSS, SQL, PowerShell  
**Frameworks & Tools:** FastAPI, Git, REST APIs, WebSockets  
**AI & Data:** LLM integration, embeddings/retrieval, data analytics  
**Leadership:** Team leadership, mission operations, process optimization  
**Communication:** Technical writing, briefing, documentation  
**Systems:** Troubleshooting, systems analysis, automation
