

Brandon Davenport

Software Engineer • U.S. Space Force Operations Officer

hello@brandondavenport.dev | brandondavenport.dev | U.S. Citizen | Active TS/SCI Clearance | Open to relocation

U.S. Space Force operations officer transitioning into software engineering, combining mission-critical leadership since 2017 with full-stack development skills and a graduate background in organizational communication and data analytics. Proven at leading teams under pressure, analyzing complex system data, and building practical tools that improve how teams work.

Experience

Space Operations Officer — United States Space Force 2017 – Present

- Direct real-time orbital operations and monitor mission-critical aerospace systems to ensure continuous mission readiness.
- Lead cross-functional teams of military personnel in high-pressure, time-sensitive environments.
- Analyze complex system data to troubleshoot hardware and software issues and drive rapid anomaly resolution.
- Optimize operational procedures to improve efficiency and minimize system downtime.
- Brief technical findings and recommendations clearly to audiences ranging from technicians to senior leaders.

Selected Projects

BARAD-DUR Tracker — AI-Augmented Project Management Platform

- Designed and built a full-stack platform from the ground up — modules for project tracking, meetings, tasks, outages, and contacts — on a FastAPI/Python service layer with real-time WebSocket updates.
- Integrated an AI service layer with a custom tool registry and semantic tool-selection engine, enabling natural-language interaction with application data via embeddings-based retrieval and LLM-driven task execution.

Office Automation Suite — Python & PowerShell Scripting

- Developed scripts that automated repetitive data-entry and system-management tasks, reducing administrative overhead and manual errors.
- Applied object-oriented programming and scripting best practices to resolve real operational bottlenecks.

Education

M.S., Organizational Communication — Murray State University 4.0 GPA

Graduate Certificate, Data Analytics — Air Force Institute of Technology 3.8 GPA

B.S., Information Technology — Liberty University 3.95 GPA

A.A.S., Mechanical & Electrical Technology — Community College of the Air Force 4.0 GPA

Skills

Languages: Python, JavaScript, HTML/CSS, SQL, PowerShell

Frameworks & Tools: FastAPI, Git, REST APIs, WebSockets

AI & Data: LLM integration, embeddings/retrieval, data analytics

Communication: Technical writing, briefing, documentation

Leadership: Team leadership, mission operations, process optimization

Systems: Troubleshooting, systems analysis, automation
